

# In-Class Demo

With Dreamweaver, establish a text-based page as opening to site. **Be sure to back up this document for later use throughout the course.**

## Requirements:

01. Open Dreamweaver and create a basic HTML page.

Save on desktop as: index.html.

02. In browser window title type: YOUR NAME.

03. Insert a table into the DW document:

- 700 pixels wide || 1 column || 8 rows
- border thickness: 0 || cell padding: 0 || cell spacing: 0
- center table on page

04. In top row, type your name, center text

- change font size appropriate for heading
- change default font
- alter color

05. In the remaining rows type the following:

project 2: HTML codes

project 3: Web Advertisement

project 4: Web Newsletter

project 5: Animated Gif

project 6: Page Design

project 8: I-Frame Design

BE SURE TO CHANGE DEFAULT FONT TO **SANS SERIF** FAMILY.

These will be come text-links for future projects.

06. Save. Upload to student server.

07. Preview in browser and screen capture published page. Turn in.
