

# GIF banner — part 2

## Creating a DW table-within-a-table

01. Create basic HTML page in Dreamweaver.

02. Insert first table

2 rows

1 column

100 % width

border thickness / cell padding / cell spacing all = 0

03. Modify > Page Properties > margins = 0

04. ID table as: "outer"

05. Insert second table in bottom row of outer table.

1 row

1 column

728 pixels wide

border thickness / cell padding / cell spacing all = 0

ID table as "inner"

center table on page

06. Insert GIF image in inner table and assign a color to this table based on image

07. Assign color to top row based on working color scheme of GIF image

08. Modify > Page Properties > select background image strategy which works with color scheme of animation
