

Cause and Effect- part 2

• Basic research practices require intense note-taking in order to provide accurate data for your paper *and* to prevent unintended plagiarism in your finalized project. • Tuesday you chose the focus of your paper. Likewise you began gathering preliminary research on your chosen topic. *Using data to defend your point is crucial for this pattern.*

OBJECTIVES

01. read the database material you printed
02. highlight relevant information and statistics you will incorporate into your work
03. print out your synopsis of the article, due Tuesday, 03.29
04. the synopsis should be *limited to one full page*: no more, no less
05. follow MLA template guidelines
06. provided below are specifics to include in your synopsis
07. utilize full sentence format when replying to
08. begin constructing a two-page essay examining a cause-effect analysis
(A full grade point will result if the paper is less than two full pages.)

FOR THE SYNOPSIS: ITEMS TO DETERMINE DUE TUESDAY 03.29

01. State author's name and title of work.
02. State the article's topic. What is the main point? What material does the author present?
03. Is the material presented using mainly logos or pathos [primary purpose]?
04. What evidence in the article proves this to be the case?
05. Quote a segment of the article which you feel presents the strongest evidence.
06. Determine what type of evidence is primarily used by the author.
07. Do you agree with the evidence provided?
08. Staple synopsis to article and turn in to me beginning of class.

FOR THE ESSAY: DUE THURSDAY 03.31

01. material follows MLA guidelines
02. use cause-effect analysis
03. no use of colloquial tones
04. evidence is accurately presented, quoting material from article
05. every body paragraph has at least one quote (intro and conclusion do not use quotes)
06. works cited page
